Community Story

Malaysia

MALAYSIA BOLEH

Living Abroad in South Korea

by Ahmad Nurzid Bin Rosli

Inha University offers a wide range programs for international students. This is among the main reason why it attracts a large number of Malaysians to enroll here year after year. Malaysians at Inha University come from different scholarship background (Ministry of Higher Education Malaysian – MOHE, Public Service Department – JPA, Malaysian Ministry of Defense and Korean Government Scholarship). At the moment, Malaysian communities at Inha University are made up from few ethnic groups. They are Malay, Chinese and few others. This significantly represents the diversity of our cultures.

"Pot-Luck"

"Food brings people together"

football game, which "Cho" mean foot and "Ku" means ball. Some of us spend a quality time at gymnasium or swimming pool.

In May, we usually get involved in yearly event call "Harmony Festival", a special festival for graduate students, which is organized by "Inha University Student Union". The program is mainly to promote unity element among Inha University students, which is believed to lead to healthy and harmonized environment. This program is also a great chance for expat students to introduce their countries to local and international students. As Malaysian community, we grab this opportunity to promote and represent Malaysia through exhibition, food and cultural performances.

As time goes by, we eventually will develop the ability to adopt Korean culture. Once you live abroad, you must enjoy both the difficulties and enjoyment experiences. Living in a new culture can be exhilarating, personal rewarding and intellectually stimulation. So, "ENJOY", life is supposed to be fun.

Malaysian students in action

The "Silat" or Malaysian martial art performers at "Inha Harmony Festival"

Every semester, we organize a "family gathering" or "pot-luck". Everyone prepare a special food to share, and of course a Malaysia delicacies. For example, we will prepare "ketupat" (dumpling rice)", "rendang (spicy meat dish)", "fried noodles or fried mee-hoon (fried glass noodles)", "curry noodles", and more. The gathering is usually held around the campus. Since everybody is living separately and busy with classes, we believe this is the best way for us to catch up between each other, and "food brings peoples together".

Sports activities also are a must. We love to play football, basketball and not to forget Korean traditional games called "Chokku". It's a Korean traditional

Diwali—The festival of light

India

Inha - Home away from home

by Sandipan Bera

India is a country of festivals. In different part of India there are thousands of festivals throughout the year. Sometime it is religious, sometime it is social, and sometime national. But despite the nature of festival, people join festival spontaneously, and celebrating. Some of the big festivals in India are Diwali, Eid, Holi, Pongal, Onam, Bihu, Dasera, Ugadi, Christmas keep on counting. Even though some of the festivals are more popular in some specific part of India, still the participation in these festivals is huge.

God, eat some special sweets, and most important decorate their houses with “Diya” means oil candle. However, now a days the oil candle is replaced by electronic lights. People use some firework also to enjoy with light.

Every year Inha students from India gather in some place to celebrate Diwali. We make different foods together. Decorate the room with light. Arrange some cultural activity like singing, dancing and many more fun. The special event is firework. We go to the play ground and ignite the crackers and burn so many other fireworks. In our busy schedule this one day brings so much happiness and fun for us. Specially meeting each other feel all Indians as one family.

In Inha University there are around 30 Indian people are living including students, post doctoral fellow or faculty of the university. Definitely we cannot celebrate all Indian festivals here. But most of the time we try to celebrate Eid and Diwali.

Diwali is the festival of light in India and celebrated specially by the people of Hindu religion in autumn every year. There are several myths behind this. Symbolically it is celebrated to signify the victory of light over darkness, knowledge over ignorance, good over evil, and hope over despair. Generally people used to arrange some special prayer to

Bioactive Material Laboratory

Introduction to Bioactive Material Laboratory

The engineering is the niche of Inha University. It composed of % of the total population. In 2009, Inha University's College of Biological Engineering ranked 11th among other Engineering schools in the same category in Joong-Ang Ilbo, one of the three biggest newspapers in South Korea.

Generally, skin possesses various study opportunities ranging from testing various bioactive materials by using cultured cells for skin depigmenting agents and screening possible compounds used for skin pathological conditions (i.e.: vitiligo). Our research work involved in the screening of active compounds for skin diseases as well as anti-wrinkling and whitening products which is one of the demanding products for the cosmetic industry in Korea. Knowledge obtained from these investigations can be applied in the development of cosmetic bioactive materials. Currently we are working on the production of anti-wrinkling, whitening compounds and screening compounds for vitiligo. Our ongoing projects are as follows:

1. Proteomic Approach for New Target in Skin Depigmentation
2. Evaluation of Chinese and Philippine herb for vitiligo
3. Molecular studies on melanoso-

mal proteins as possible target for Skin Depigmentation

4. Development of Anti-wrinkling agents

The environmental biotechnology encompasses the study of biomateri-

factant as an antimicrobial agent

Producing peptide antibiotics from citrus-process waste

Publications

For further information regarding **Bioactive Material Laboratory**, please visit our websites at

<http://bioactive.inha.ac.kr/>

Application of Sophorolipid biosur-

There are ten research laboratories in Biological Engineering Graduate School.

The Bioactive Material Laboratory is led by Professor Eun Ki Kim. The lab conducted research works related to functional cosmetics, skin bioactive material, BioChip for HTS and antimicrobial compound identification. It also focuses on the biotechnological production of bioactive materials in the two major fields namely environment and skin biotechnology.

Alumni Talk

During my study, 2009-2011, I almost spent my days enjoying every little bit of my dynamic's life. Study was the main purpose for me in Korea. Actually it was because I got scholarships from Cheil Jedang Indonesia which provided my living expenses and Inha University as a sponsor for my tuition fee.

“Studying at Inha University completely enlightened me.”

Mr. Syamsul Bahri - Indonesia
Master of Engineering in Marine Science and Biological Engineering

I came to Korea with another scholarship grantee. I regretted my decision for taking my master degree in Korea at first. Why? It was because I didn't even know a single word of Hangeul. I was not a big fan of Hallyu star and Korean Drama was not my favorite soap

opera. But life must go on. I met my roommates, we shared laugh, exchanged culture, and threw some jokes. Korean people are also nice; my lab mates helped in my research (Bioengineering Dept) and slowly but sure my Korean proficiency rapidly improved (I can comprehend some basic and intermediate conversation). Furthermore, Inha also supports International culture. We participated in International culture festival day, during this event, we performed traditional dance from Indonesia and cooked some Indonesian foods. The Enthusiasms of Korean and other foreigners at our booth boosted our spirit. Perfect environment made my study run smoothly. I passed my each semester quite good and did final exam for graduation and here I am, as an alumnus of Inha University. After graduation, thankfully I got a job as a researcher at Cheil Jedang Indonesia. The company works for biotechnology production in Indonesia, especially amino acid and nucleotides. This field fits perfectly with my education's background. More than 2 years after graduation, my Biotech knowledge and Korean language helped me much. My Korea language proficiency is often used while talking with expatriates, sharing information from CJ Headquarter in Korea, and explaining to my colleagues some Korean-written papers.

prepared by Williem

Dr. Nguyen Van Huan - Vietnam
PhD in Information and Communication Engineering

“Wherever I go, Inha Univ is the best place in my heart”

He is Nguyễn Văn Huân, one of the most excellent Vietnamese students at Inha University. In Vietnam, he was a member of the “excellent student scholarship” during bachelor degree at Hanoi University of Technology. He came to Inha University in August, 2005 for the master course in the IT department. After completing the master degree he continued to pursue the PhD degree in the same department. During the master and Philosophy research duration, he submitted dozens of paper in domestic and international conferences and journals. Moreover, he was always a team leader in projects of his laboratory.

He graduated in 2012 and worked as a post-doctor researcher at Computer Vision Lab for six months. Then thanks to his professor's recommendation, he got a job in IVS Tech. Company. Because of his effort and capability, now he is a manager in the R&D department of the company. And next semester he will come back to Inha University as an associate professor. He says: “wherever I go, Inha University is the best place in my heart”

prepared by Pham Thi Huyen Trang

Alumni Talk

Dr. Murad Ali - Pakistan
PhD in Business Administration

Graduation : New turn in life

Spending almost six years in Inha University is a big span of my life. These six years were full of joy and happiness. One of the happiest days of my life was when I came to know that on Feb 21, 2014, finally I will have Ph.D degree on my resume. I want to thank Inha University

for this honor. Doing Ph.D at Inha University was a wonderful experience. Starting from scratch, taking classes and doing research was not easy at all. During my Ph.D, I was lucky to get many achievements, honors and fellowships. I was selected for the Jungseok International Scholarship of Inha University and International Rotary Fellowship, Korea. I was Inha Student Ambassador since 2011 and I was selected as *best ambassador* for the two consecutive years 2011 and 2012. I have presented my research work in different international conferences and my work has been published in various international proceedings and journals. My research work received a distinguished research award, *the Linsu Kim Memorial Award 2012*, from the Korea Academy of Management. I will also start my professional career at Inha University this year as a part of faculty member. There is a great role of all my professors especially my supervisor Prof., Kichan Park and friends at Inha University for these achievements. One of the best qualities of Inha University is that all the professors are encouraging research and they provide any kind of possibilities for good quality research. There are lots of opportunities at Inha University but someone has to explore them. One of the interesting programs at Inha University which greatly inspired me is the Inha Student Ambassadorship which provided many opportunities of culture exposure, food festival, trips, friendship and last but not least to help new students. I wish that this program will keep continue. I wish the best of luck for Inha University at every moment.

by Murad Ali

Dr. Zhang Ning - China
PhD in International Trade

Student to Professor : A new dimension

Since graduating from Inha University, I have worked as assistant professor at Jiangxi University of Finance and Economics (JUFE) for about half a year. Now, I would like to share some of my work experiences from the past six months. First, working is different from studying; as a student, you can only focus on study and research, while working involves many administrative tasks. Therefore, you should treasure your time as a student and try to learn as much as you can. Second, no matter how many outcomes I achieved in the past, becoming a professor was a new start for me, with a future full of challenges. I now have many new goals, such as applying to the Grant of National Research Foundation of China; therefore, I should do my best from now on. Third, as a teacher, I felt a responsibility that is different from the kind of feeling as a student; for example, I must prepare lessons very carefully in advance, and be responsible for the students who take my class. In summary, I enjoy my new job and look forward to a happier future.

Discover Country

'Be Our Guest'

Turkey (Turkish: Türkiye) is located on the Anatolian region of West Asia and on the Southeastern Europe.

Asian Turkey is separated from European Turkey by the Bosphorus, the Sea of Marmara and the Dardanelles. With the Black Sea to the north and the Aegean Sea in the west and Mediterranean Sea to the southwest, Turkey is surrounded by Bulgaria and Greece to the west, Armenia, Azerbaijan and Georgia to the northeast, Syria, Iraq and Iran to the southeast. Turkey was founded in 1923 from the remnants of the Ottoman Empire.

People

The total population in Turkey was last recorded at 75.6 million people in 2012. Turkish is spoken by over 200 million people and is the world's 7th most widely used language. Today's Turkish has evolved from dialects known since the 11th century and is one of the group of languages known as Ural-Altaic which includes Finnish and Hungarian. Although 99% of the population is Muslim, in Turkey religion is seen as strictly a private matter. In fact, Turkey is the only Islamic country which is a secular state.

Visitors to Turkey are often pleasantly surprised by the friendliness of the Turkish people, who will go out of their way to assist and happily spend time chatting. Hospitality is a cornerstone of Turkish

culture, and Turks believe that visitors should be treated as Guests sent by God. Most Turkish people like to meet foreign visitors, learn about different cultures and practice their language skills. It is usual for Turkish people even the men to greet each other by kissing on both cheeks. As a tradition, Turkish people treat their national flag as sacred. Therefore, one should avoid insulting or showing disrespect to the Turkish flag.

Climate

All of the four seasons exist in Turkey. The rectangular shaped country is surrounded on three sides by three different seas. Its shores are laced with beaches, bays, coves, ports, islands and peninsulas. The summers are long, lasting as long as eight months in some areas. Turkey is also blessed with majestic mountains and valleys, lakes, rivers, waterfalls and grottoes perfect for winter and summer tourism and sports of all kinds. Skiing fans, mountain climbers, trekkers, hikers and hunters can enjoy new and unforgettable experiences in Turkey.

Tourism

Turkey offers a wealth of destination varieties to travelers: from dome-and-minaret filled skyline of Istanbul to Roman ruins along the western and southern coasts, from heavily indented coastline against a mountainous backdrop of Lycia and wide and sunny

beaches of Pamphylia to cold and snowy mountains of the East, from crazy "foam parties" of Bodrum to Middle Eastern-flavored cities of Southeastern Anatolia, from verdant misty mountains of Eastern Black Sea to wide steppe landscapes of Central Anatolia, there is something for everyone's taste whether they be travelling on an extreme budget by hitchhiking or by a multi-million yacht. Therefore, it is not surprising that this country has recently become one of the world's most popular tourism destinations. Turkey is a huge open-air museum, a repository of all the civilizations nurtured by the soils of Anatolia. The huge amount of historical and archaeological wealth in Turkey seems more appropriate for an entire continent than a single country. Recently, a new field of tourism has opened up: health tourism. The country is in fact rich with hot springs, healing waters and healing muds, which come highly recommended by the medical authorities as a remedy for many diseases.

For centuries, Turkey has also been a crossroads of religions, not only of Islam and Christianity, but also of many others now forgotten by history. Many religious devotees can find a site, a shrine, a monument, a tomb or a ruin connected with their faith or belief.

Best Places to Visit in Turkey

Istanbul: Once serving as the capital of the Ottoman and Byzantine Empires, Istanbul today is the largest city in Turkey and one of the largest in the world. Istanbul stretches across a narrow strait that connects Asia and Europe, making it the only city in the world spanning two continents. Impressive architecture, historic sites, dining, shopping, nightlife and exotic atmosphere all make Istanbul one of the best places to visit in Turkey.

Cappadocia: Situated in Central Anatolia,

Cappadocia is best known for its fairytale landscape of unusual formations resembling chimneys, cones, mushrooms and pinnacles. Natural processes such as ancient volcanic eruptions and erosion have all sculpted these odd formations over the ages. Thousands of years ago, mankind added remarkable touches to the landscape by carving out houses,

churches and underground cities from the soft rock.

Ephesus : By the 1st century BC, Ephesus was one of the largest cities in all of the Roman Empire, boasting one of the Seven Wonders of the Ancient World, the Temple of Artemis. The ruins of Ephesus are well preserved and

contained within a large archaeological site, making it one of Turkey's most popular tourist attractions. Its attractions include the massive Theater, the Temple of Hadrian and the magnificent Celsius Library, a two-story structure that was built to house more than 12,000 scrolls.

Bodrum: Located in the southern Aegean region of Turkey, Bodrum was once home to the Mausoleum, one of the Seven Wonders of the Ancient World. Today, its intriguing ruins, stunning beaches and cliff-top resorts attract people from all over the world. No visit to Bodrum would be complete without seeing the Castle of St. Peter, also known as Bodrum Castle. Built from 1402 by the Knights Hospitaller it now operates as a museum.

Marmaris: One of Turkey's most popular seaside resorts, Marmaris is a picture-perfect setting of pine-clad mountains, sandy white beaches, turquoise waters and historic architecture. Located along the Turkish Riviera in southwest Turkey, this stunning cruise port is a tourist paradise with exceptional sightseeing opportunities, water sports, adventure, fantastic dining and buzzing nightlife.

5. Side: A major port in ancient Pamphylia and occupied by Alexander the Great in 4th century BC, Side today is a picturesque town of classic ruins and modern day resorts overlooking sandy white beaches. Located on a small peninsula, Side offers fantastic sightseeing, dining and nightlife.

Its star attraction is an excavated site of ancient Hellenistic and Roman ruins that include the remnants of a colossal amphitheater and various temples.

Cuisine

Turkish cuisine is renowned as one of the world's best. It is considered to be one of the three main cuisines of the world because of the variety of its recipes, its use of natural ingredients, its flavors and tastes that appeal to all palates and its influence throughout Europe, Asia, the Middle East and Africa. The cuisine originated in central Asia, the first home of the Turks, and then evolved with the contributions of the inland and Mediterranean cultures with which Turks interacted after their arrival in Anatolia.

Discover Country

People's republic of China

by Zhang Yanyan, Li Lian

Where is China?

China is in the east of Asia, surrounded by 14 countries. China has 12.6 million km² area and 34 provinces.

China has long history & various culture

China has five-thousand-years history. Our ancestor established Xia dynasty at 1000 B.C., Qinshihuang united six kingdoms at 221 B.C. People's Republic of China established in 1949.

In China there are 56 ethnic groups, including Han, Zhuang, Manchus, Hui, Miao, Uigures, Yi, Tujia, Mongols, Tibetans etc. The Han Chinese are the largest ethnic group, where some 91.59% of the population was classified as Han Chinese.

China-Korea relation is solid

Most of Chinese students in Inha come from three provinces in the northeast of China (including Heilongjiang, Jilin, Liaoning Province) and Shandong province.

As we know, In the 1930's~40's, Japan established Manchukuo in northeast China. At that time, South Korea was a Japanese colony, so many South Korean moved here. Then they became the Korean ethnic group later. The Korean ethnic group is called "chaoxian zu(朝鲜族)" in China, "Korean Chinese" in Korea.

The Korean ethnic group in China are mainly in Changbai Mountain Area. Though they have Chinese nationality, most of whom speak Korean language, and they retained the Korean ethnic traditions. They like wearing white clothes which stand for pure and simple. People of the Korean ethnic group in China are fond of varieties of sports, such as wrestling and playing football, and also they are all good at singing and dancing.

Discover Country

People's republic of China

What's more, they have over one thousand schools, of which Yanbian University is very famous. With the development of South Korea's economy, more and more Korean Chinese is going back to Korea for working or studying.

Shandong province is the nearest province to Korea. There are many Korean companies in Shandong province, in order to promote employment, many universities in Shandong set up Korean department. It is the main reason why there are so many students from Shandong province study in Inha.

Shandong province is an area with long history, there are two famous scenic spots in Shandong, one is Taishan Mountain, the other one is Qufu (曲阜). Taishan Mountain, a typical representative of the Chinese famous traditional mountains, is a mountain with a long history and a special historic status. In 1982, Taishan Mountain was listed into the list of State key scenic spots and was formally listed in the directory of World Natural and Cultural Heritage in 1987.

It becomes a precious heritage of human being. Qufu is the hometown of Confucius, who is traditionally believed to have been born at the nearby Mount Ni. The city contains numerous historic palaces,

temples and cemeteries. The three most famous cultural sites of the city, collectively known as San Kong (三孔), i.e. "The Three Confucian", are the Temple of Confucius (孔庙), the Cemetery of Confucius (孔林), and the Kong Family Mansion (孔府). Together, these three sites have been listed as a UNESCO World Heritage Site since 1994.

Now more and more Chinese students are studying in Inha. Though they are from different provinces, even from different ethnic groups, they get along with each other like a family.

Welcome to China!

China not only has a splendid history, but also has a promising future. As we know, the 29th Olympic Games and 41th World Expo were held successfully in Beijing and Shanghai at 2008 and 2010, respectively. Also China is an open country. We welcome friends from all over the world.

Events – Helping Hand

Fund raising program for the victim of Hayan in Philippines

Last November, a super typhoon hit the Philippines. It caused devastating damages. Houses were destroyed, roads became unpassable, the people's livelihood vanished with the storm and there were many casualties.

estimates that over 14.9 million people have been affected by Typhoon Haiyan. This includes 4.13 million people displaced from their homes, of whom an estimated 204,131 are still living in 1,031 evacuation centers.

On November 30, according to the Philippine National Disaster Risk Reduction and Management Council (NDRRMC) the death toll from typhoon Haiyan in the Philippines rose to 5,632 and counting.

Thus last November 21, 2013, a fundraising was held here at INHA University. We were able to raise 1,137,000 won (from mangoes and personal donations). The proceeds were forwarded to Pinoy Iskolars in Korea (PIKO) who will forward the money to Association of Social and Health Advocates Inc. and Philippine Red Cross. The proceeds came from selling of mango at an affordable price. The mangoes were purchased from Mango Mania. We were able to sell 35 boxes of mango (from booth selling and personal orders). Aside from that

some people also donated money as well as in-kind donations. We were able to collect at least 6 boxes of relief items. We sent the goods to Cordillera Brotherhood Association since PIKO's deadline

for relief collections has already passed. The Cordillera Brotherhood Association will send the goods to the WaraynonLeyte Organization (this organization

"Little deeds of kindness, little words of love, make our earth an Eden, like the heaven above"

is for the Indigenous peoples in Leyte, those who were primarily affected by the super typhoon). Your help is greatly appreciated.

Students were given post-its and pen to write messages for the victims of the typhoon. It was very heart warming because even if we have different nationalities, people were there to give not only financial support but also encouragement to strive and overcome this unfortunate event .

INHA student ambassadors, the graduate school and other internationals students help as much as they could for the fundraising to be a success. Miss Ji-Hee Kim was one of the key persons for the success of the fundraising. She organized as well as sold boxes of mangoes to her family and officemates It takes a lot of courage to pursue and persuade customers to come to the booth.... Kudos to the members of the graduate school for doing this.

Can you believe it? 30 boxes were sold in just 5 hours!

Upon transferring the money, the organization forwarded a letter that they receive the amount that we sent.

by Melanie Chinayog Ayungo

Events – Field Trip (Winter)

2013 Field Trip to NJP Art Center & Korean Folk Village

On 21st December 2013, we visited two famous places, Nam June Paik art center and Korean folk village in Yongin city organized by our graduate school. .

The first one was Nam June Paik art center in Yongin city. Nam June Paik (July 20, 1932 – January 29, 2006) is considered the founder of video art.

We visited this art center named as **Gentle disturbance**. This name made us more curious about the theme of this art center. Basically this art center is composed of different interesting items and Mr. Paik tried to use the power and significance of video art. The *Tv – Garden* is one of the attractive items. This is basically indoor gar-

den with around thirty televisions on the floor with large number of trees. This garden represents the combination of our nature with the artificial environment. All the televisions are flashing with videos in the mesh of green trees. This is

actually the reflection of life and gentle disturbance.

There is one section of Piano and letters. Here the foundation is Piano and many letters are hanging on it. Some letters are handwritten and there are some pictures also. It seems like some memory.

Another interesting item is Paik's suicide robot. That represents our daily life by this robot. The sound produced during defecation and reaction of body during breathing make it realistic behavior. It has some message also, we should always careful about them who are under control. Because, at last that robot committed suicide.

Overall that museum was very enjoyable with different theme.

After visiting this art center, we went for lunch and it was Korean traditional food. And this type of food with different taste is always attractive for foreigners. We enjoyed it also.

The second place was Korean Folk village. That place was the combination of different part of Korean traditional life and culture. That is really informative to foreigners. It provides an outdoor museum and already famous as a tourist spot in Korea. Most of the items in this folk village are very interesting and some of them are

really delighted me too much.

The tightrope is one of them. The performer was an old person who can walk on the tight rope with proper balance. Not only that, he showed some performance also like jumping from one side to an-

other. He did some attractive performance. Another one was horse riding event. That was explained to us by a young man wearing Korean traditional dress. That performance was done by some young men and women. They rode the horses and showed the performances with different style like sitting on the horse, sometimes standing, rope jumping and making pyramid shape also. Actually these two places are worth to visit. And I with my friend enjoyed a lot. That is why, I would like to thank the organizing body of this field trip of Inha University.

Notice Board

[INHA University's Recommendation for 2014 KGSP]

Deadline of application Period: March 19th(Wed), 2014

Number of students for 2014 KGSP recommendation:

Max. 20 students (Max. 3 from one country)

How to apply : Submit required documents to the graduate school office by postal mail (DHL, Fedex, etc.)

Scholarship Period: 1 year of Korean language learning program

+ 2 years for Master's degree / 3 years for Doctoral degree

Scholarship Amount: Full financial support including tuition fees and monthly allowances (KRW 900,000), etc.

Eligibility for application:

① Less than 40 years of age, ② G.P.A. : Min. 80 out of 100, etc.

For details about 2013 KGSP, visit the link http://gradeng.INHA.ac.kr/board_notice_en/View.aspx?Seq=34943&CateNum=&PageNum=0&SearchField=Title&Keyword=&SortExp=&SortDir=0

NIIED homepage: <http://www.niiied.go.kr>

Special Messages to Alumni

1. Send a message about your current job position and contact information to graduate@inha.ac.kr as a member of Inha global alumni Network. The Graduate School will keep sending a newsletter or useful notices for alumni.

2. Send you message and your story to graduate@inha.ac.kr. After selecting then we will upload them for the next issue.

3. If you need any certificates about your academic records at Inha University, you can use Internet Certificate Issuing System <http://certpia.inha.ac.kr> or apply for the postal service of certificate issuance. For details, visit http://gradeng.inha.ac.kr/campus/campus_050401.aspx

4. Promote 2014 KGSP and Junseok International Scholarship Program about admission for fall semester of 2014 to many excellent international students in your country.

Editor's Desk

The third Issue of INHA Global Messenger wanted to build awareness with regards to the activities of the graduate school. It also aims to provide information to our fellow Inhaians and to encourage international students to consider INHA for their graduate studies. Through this publication we can be able to promote the experience of INHA International graduates that has been successful in their field of expertise.
