An aerial photograph of the Inha University campus. The foreground is dominated by a large, well-maintained green lawn with scattered trees and manicured shrubs. A paved road with a blue-painted curb runs horizontally across the middle ground, with several cars parked along it. In the background, a cluster of modern university buildings with various architectural styles is visible, set against a backdrop of a city and distant mountains under a clear blue sky.

INHA GLOBAL MESSENGER

FOURTH ISSUE

AUGUST 2014

Vietnam Student Community

We are Vietnamese INHANIANS, we are strong and united. We pledge to be one as brothers and sisters.

The Vietnamese Community

Among all the busy students at Inha University, there are about 30 Vietnamese students who often stop for a social get-together. In these gatherings sometimes you may observe a dangerously excited individuals. We have agreed to call ourselves the Vietnamese Student Community in Inha University and consider that we should call for participation from anyone who would like to enjoy his/her time with us, students, professors, family members, everyone is welcomed at our community.

Recently most of our members are doing master/doctorate program. The

others are distributed between Korean language center and Inha hospital's trainee doctors.

In case some of you haven't met any member of the community, at least you might have noticed or get annoyed by a group of people that looks a bit like each others and a bit different from everyone else, who eats a delicious-looking and funny-smelling kind food. Those are us celebrating a welcoming/goodbye party at the beginning of every semester or anytime we feel like to go out of our routine and have some fun. In these parties, we often prepare a home-made Vietnamese food and meet all together at the park near the university or sometimes we may go to a Korean restaurant around the back gate of Inha University – the paradise of delicious and cheap meals. For the second round, we move on to the karaoke to sing, dance, and drink until getting exhausted.

After all that excessive drinking and eating, we try the healthy lifestyle through many kinds of team sports. Even if someone is not good in playing the game, he/she can just have fun by cheering for our team. Going to Seorak Mountain for autumn hiking and Wolmido park to enjoy the view of the sea are also our options.

The VSAK Event

Moreover, we participate in the annual International Student Festival, Vietnamese Students' Association in Korea (VSAK) event, football tournaments among universities and other activities held by the university. We are not maybe in same lab or department but we are always at the same side in any challenges as Inha University Vietnamese Student.

Well, if we must publish a billboard about them, the headline could be “we stand the strongest when united”.

Bangladeshi Student Community

The Memories of Friendship

As an international university, INHA university has students from all over the world. Among them there are around 16 Bangladeshi students. Basically the people of Bangladesh are very outgoing, and interesting. We often meet for fun activities and some exciting trips.

I am highly pleased to get the chance to write something about our community of Bangladeshi

students. This is because I believe we have a very interesting memories in Korea. Every semester we try to arrange different types of programs like visiting nice places, BBQ party, party at friends' house etc.

My very first tours was to Sonje Island(선제도)

and Nami Island (남이섬 종합휴양지). They were kind of breathtaking trips, in which we had a lot of fun enjoying one of the best sightseeing, it is long lasting memory. When I leave Korea these events will evoke pleasant memories of my student life in Korea. We have a lot of plans to visit more outrageous places in the future.

In my view Bangladeshi student community has a small impact to enrich the multicultural campus

at this University. We always keep in touch and cooperate. If the University arrange different programs like food festival, international festival etc., we try to participate and enjoy with other students. Especially at the Muslim festival we have gatherings to celebrate our feast. In these feasts we buy new cloth, we cook some Bangladesh food, and we go out to meet other Muslim people from many different countries, and enjoy best time together.

“Our Bangladeshi student community really enjoys the student life at Inha.”

Eco-smart power lab

Eco-smart Laboratory
Department of Mechanical engineering
Located at 2N 265 / 2N 279

Eco-system smart power lab is a part of mechanical engineering department in Inha university and it is directed by professor Hyunchul Ju.

In our lab we always work hard to reach the ultimate results for our researches, but beside all that we don't forget to take a rest from time to time and enjoy time together.

Every Saturday after we finish the weekly meeting we meet all together for a lunch in which we talk about our daily life with the professor, also during the year the professor always make sure to organize some trips such as skiing, watching baseball games, having dinner and others, in order to enhance our relations together.

In lab we are all like brothers, we help each other's and we always give advices for the new students, as well as we help them to get familiar with our lab duties.

Recent Academic Works

- ◆ Comparison on thermal equilibrium time helium loop temperature in in-bed calorimetric.
- ◆ Numerical Study of Thermal management effect by Coolant plate number per cell number in High-Temperature Polymer Electrolyte Membrane.
- ◆ A rapid start-up strategy of polymer electrolyte fuel cells from subzero to normal operating temperatures via controlling operating current density.
- ◆ Modeling and simulation of 20kW Fuel cell system with chemical reaction rate of reformer, of some major birth defects in Korea.

With respect to our work the ESPL's general research interest is to investigate and develop an alternative source of energy, that can conserve our natural resources, and be environmentally friendly.

Currently, among all the imaginable energy technologies for a sustainable future, the primary research of the ESPL is focused on fuel cells and advanced batteries for vehicle propulsion, stationary power generation, portable electronic, etc.

•CFD (computational fluid dynamics) simulation :

- development of multi-scale fuel cell numerical models including multi-phase and multi-physics (electrochemical and fluid structure interaction analysis) models for DMFC (direct methanol fuel cell) and PEMFC (polymer electrolyte fuel cell).
- numerical simulation of the hydrogen absorption and desorption reaction for metal hybrid bed.
- research on electrode material, component design, and theoretical modeling of RFB (redox flow battery).

•MEA (membrane electrode assembly) fabrication and performance evaluation .

- Development of advanced MEA for DMFC and PEMFC.
- Optimization of fuel cell materials and geometric designs.
- Development of advanced bipolar plate using pre-preg and composite materials.

Social and Preventive Medicine

Social and Preventive Medicine Laboratory
Department of Medicine
Located at Inha Hospital

The department of Social and Preventive Medicine (SPM) at the School of Medicine of Inha University has been a leader in its field since the establishment of medical department in 1985 and has made many noteworthy contribution to the understanding of community and public health. The department of SPM, which is led by Professor Lee Hun-Jae, aimed to reinforce community health including workplace through medical and socioeconomic approaches; jointly with the department of occupational and environmental medicine (OEM) at Inha University Hospital.

I find several of my laboratory features to be quite helpful and interesting. The OEM laboratory provides a large array of clinical and environmental testing that allows us to diagnose disease and tracking of its progress through a population, monitoring the environment to detect threats to health from pollution, and keeping track of chronic medical

conditions to prevent them from becoming serious issues in the future.

Our department has a blend of expertise on social and medical sciences, research, and teaching that makes it unique among departments in the university. The prevention and management of disease is achieved through clinics, awareness campaigns, training, and specialized researches on epidemiology of cancer, nutrition, infectious diseases, epidemiology of environmental, children's health, and cardiovascular disease research.

Our research is at the very core of our goals to promote the public health of diverse populations. This is also reflected in our training program with graduate degrees for students interested in social and preventive medicine. Currently, there are two PhD students. The department provides a competitive research environment with the availability of cooperative professor, seniors, and post-doctoral fellow and of eclectic research approach.

Our department is coupled with talented faculty with the publication of research article in a high quality journal along with opportunity to participate in domestic and international conferences. We have a productive and welcoming work environment, places our department to be a leader in many future discoveries and in the training of prevention/public health researchers.

Recent Academic Works

- ◆ The effects of dietary antioxidants intake and exposure to traffic-related air pollution on asthma in school children
- ◆ Patterns in the prevalence of some major birth defects in Korea
- ◆ Secondhand tobacco smoke: a risk factor for occupational injury among manual workers in South Korea
- ◆ Association of infant and young child feeding practices with under-nutrition in children: Evidence from Nepal Demographic and Health Survey
- ◆ Impact of prenatal exposure to polycyclic aromatic hydrocarbons and barbecued meat consumption during pregnancy on birth outcomes
- ◆ Status of health inequality and health determinants on population health.

Discover Country

Discover our Country: Traditional food of Uzbekistan

Food is probably one of the common things that international students crave most from their home countries. As one of the international students at Inha University I am not an exception. In this article I am going to make a brief introduction to the traditional food of Uzbekistan I miss most. I hope this article will be useful for you to decide what to order in Uzbek restaurants in Korea or Uzbekistan!

The particularly distinctive and well-developed part of the Uzbek culture is the lip-licking cuisine. Uzbek food is

probably one of the main sights of Uzbekistan, which will become the discovery for all gourmets.

The Uzbek cuisine has been influenced by other cultures, but all borrowed dishes have unique Uzbek traditional rituals and ways of cooking. National recipes are passed on from one generation to another.

Uzbek Tea

The main drink in Uzbekistan is undoubtedly tea. Any meal in Uzbekistan starts with Uzbek tea and ends with it. A guest in any house will be offered a Piala (cup) of tea. The most popular is green tea (Kuk-choy). Black tea (Kora-choy) is loved by Uzbek people as well. Uzbek tea with sugar has its own name - Kand-choy. In some regions of Uzbekistan people drink tea, both black and green, with milk.

Wedding Pilaf (Palov)

Pilaf is the main dish of the Uzbek cuisine. This is a delightful mixture of rice, bits of meat, grated carrots, onions, and raisins (with a clove of roasted garlic on top). The “wedding” part refers to the fact that it’s easy to cook in large quantities (traditionally in a Kazan over an open fire) and is often served on special occasions, like weddings. During your travel to Uzbekistan you will have a chance to taste pilaf cooked in different ways: the way of cooking pilaf varies in the different regions of Uzbekistan. Although women usually do most of the cooking in Uzbek families, men are consid-

Discover Country

Lagman Soup

Lagman is one of the most favourite dishes of Uzbek people. This is a spicy, meaty broth filled with chunks of lamb, handspun noodles, and vegetables. I suggest you to have an experience of preparing handspun noodles. The process is just amazing! There is also non-soup version of Lagman which is called fried Lagman.

Naryn

Naryn, or norin is an Uzbek traditional dish composed of hand-rolled noodles and horse meat, served with minced onions and black pepper. Delicious naryn is mainly cooked in the capital of Uzbekistan, Tashkent. Naryn can be served as a cold noodle dish (Kuruk Norin – dry norin) or as a hot noodle soup (Khul norin – wet norin).

Samsa

Samsa (meat pies) is a pastry pie stuffed with meat and onion, potato or pumpkin, and herbs traditionally baked in Tandyr. Tandyr is a cylindrical clay oven, heated with coal. Skill is needed when placing the raw Samsas or non (Uzbek bread) on the inside wall of the oven. Samsa can be of different shapes: triangular, square or round.

Manty (steamed dumplings)

Traditionally steamed dumplings are sprinkled with dill and served with sour cream. Meat (usually lamb or beef), vegetables (onions, potatoes, pumpkin) and herbs (normally in the spring) can make up the stuffing. Manty is one of the most delicious dishes of Uzbek cuisine.

Chuchvara Soup

A soup in which very small dumplings are boiled in salt water or bouillon and served with sour milk ("Suzma") and seasoned with pepper, onion, tomato paste, black pepper, and sour cream.

Kebab (Shashlik)

This is chunks of lamb, beef or chicken served on steel skewers and topped with slices of raw onion. The dish originated in the areas between Turkey and Russia, and the name itself is derived from the Turkish word shish, which means "skewer" and is part of the name of a similar food known as shish kebabs.

Welcome to Uzbekistan!

Discover Country

It's more fun in the
Philippines

Discover the Pearl of the
Orient Seas

Let's Travel

OK! So let me tell you why the Philippines seems to have a lot of culture?

The people of the Philippines are called Filipinos and have adopted to various cultures. The reason behind this is due to a variety of colonizers who has not only been fascinated with the beauty but also with the wealth of our Island. It includes the Spaniards, the Americans, and the Japanese. The Philippines attained its independence on July 4, 1946.

The name of the island was first called Las Islas Filipinas in honor of King Philip II of Spain, a name given to the archipelago by Ruy Lopez de Villalobos.

I think that my country has a

lot to offer when it comes to the beauty of nature. Considering that it is a Tropical country thus, roaming around this paradise is going to be exciting. Let's see how long it takes you to travel the Philippines, the country of 7100 Islands?

Is it Safe to travel?

Definitely! it is safe to travel. I guess there are some circumstances that you might have heard or seen some things that has been going on from the radio and TV. Don't worry because the people here in general is really friendly and also the government is still in control of protecting everybody. A piece of advice. don't be too worried or paranoid. Those things does not happen to everybody right? If you are a traveler then try to experience everything. Be brave and just have fun. It's part of living.

Live , Love , Have Fun

Hey look at me jump, run and just go everywhere. That is what this island is asking you

A beautiful photo with a painting backdrop. Oh yes! It just looks like a painting but these images are true. And yes again, they are found in the Philippines. You don't have to go to the Middle east to experience the Dessert. We have it in Ilocos Norte. We call it Sand Dunes. You don't have to go to the Bahamas to experience white fine sand on the beach. White beach can be found in a lot of places such as Boracay, Palawan, Anawangin and other places. You may also want to explore the underwater of these

to do. A lot of foreigners come to the Philippines to spend their holiday with their love. They go there to live the life, live the experience and sometimes even end up living there for good. Ahaha! Cool right. Why did I say love? Because you will definitely fall in love with this country that is why I told you some end up staying here and obviously you are here to experience the fun. I know you will ENJOY.

Destinations, Foods and Festivals

A World of Wonder

Being adventurous in this country is a must. The islands has a lot to boast to the world and it will give you a lifetime experience. The people itself will welcome you having full smile on their faces and I experienced this myself during my travels.

If you are a person who is fond of beaches then Palawan and Boracay is the place for you. But most likely for water sports and other water activities, it is much common in the whole island since we are surrounded with water. For those who likes to hiking then I would say climbing Mt. Pulag and Mt Apo is the best choice. Even just going to a province anywhere else will give you the peace and calmness you are looking for.

Incredible People

The Philippines has dozens of festival and also different at every region. These festivities includes some such as: Ati-atihan, Dinagyang, Sinulog, Panagbenga, Moriones festival, Flores de Mayo, Pahiyas, Pintados and many more.

Amazing Foods

Satisfying your taste buds with cuisines from different regions will always be the best part for visiting the Philippines. Every province has special delicacies which will definitely let you try everything. And sometimes these food are even the fear factor food for the westerns.

Do you think you can handle

The Korean Invasion in the Philippines

I Didn't mean literally taking control of our country but ever since these K-pop craze has came out. It also started to take a roaring increase of people crazy on K-pop stars and these Korean drama series. My cousins are also into it and they even told me that they will visit me here in Korea for them to see the K-pop stars. I think Koreans has the biggest number when it comes to foreigners visiting our country. Also a lot of them go to the Philippines for studies.

Baguio City, a small city on a hill was actually labelled as mini Korea by some people because of the increase of Koreans living and studying there. Well, I guess the good relationship between our country is getting stronger and making us closer to each other.

Prepared by **Leonard Guinguino**

A Criminal Prevention Lecture

Safety is a primary concern for the students and university which regularly organize seminars on safety issues. Last June 18th 2014 university organizes one seminar along with so many students, I also got the chance to attend a criminal prevention lecture and safety education program at the auditorium (BF1, main building). The program was organized by Nambu police station of Incheon and the speaker was officer Kim Young-Guk. He talked about several ways of creating a safer environment for students in Korea. The seminar was very informative, useful and interesting which it contained the following:

1. **Easily committed criminal offenses:** Being a foreigner, We have to know the Foreign Exchange Act violations as well as Immigration Control Act violation. It includes students possessing visa (D-2) while doing a part-time job, requiring them to have additional (S-3) visa. All activities must also receive advance permission from local immigration office. For more information about doing part-time jobs, please visit INHA international center.

2. Avoiding different types of Crimes

You better not try, I'm telling you why.

Fraud by phone or internet, Sex crimes and possession of harmful weapons is punishable by law. Emergency whistle, umbrellas, combs and other items may be used for self-defence. Also other things you should do includes screaming, biting, or eye poking, etc in times of danger. Moreover, discussions on following the traffic rules should be followed to prevent traffic accidents.

Beware when crossing the street!

3. Tips (How to deal with emergency situations):

- Call 112 and report: When, where, and how
- For Traffic accident:**
- After the incident, the victim should be quickly aided,
 - Use spray or camera for gathering evidence.
 - Report accidents to police immediately.
 - Inform the accident insurance company if necessary.

Fine and Injunctions

4. Other knowledge worth knowing:

- In case of fire, we must call **119** and report the location of the incident.
- You may call **112** or give statements by visiting the police station (public service center)
- Visit website at www.safe182.go.kr and <http://café.never.com/facenter> for foreign help center website.

As a foreign student in Korea, I am convinced that it is important to keep the above information in mind and save all phone numbers on our mobile phones. Apart from that, I would recommend everyone to participate in any informed events or lectures which would be held in the future for our own benefit.

Emergency Response Guide The Right Way ... and The Wrong Way

In each emergency situation, follow these guidelines for your safety

Accidents can happen at any time so always be ready to take the following actions at the time of emergency:

1. In case of medical emergency, call 119 or the Control Headquarters at (032) 860-8597 and if a trained person is available then he can provide appropriate first aid while awaiting the arrival of emergency responders otherwise do not move the patient unless absolutely necessary. Few people must stay with patient until assistance arrives. In case of lab accident or hazardous material spill, firstly evacuate the

TAKE NOTE OF WHAT IM SAYING OK!
I BET THIS IS FOR YOUR OWN GOOD..

affected area then call the Disaster Prevention Team at (032) 860-8366 or the Control Headquarters at (032) 860-8597. At the arrival of team, provide any information you may have as to the location and extent of the spill, and as to the chemicals involved or stored in the area. The people who may be contaminated by the spill or release should not be contacted with others and medical assistance must be provided to them.

2. For power outage, individual must control his nerves and remain calm then notify the Control Headquarters at (032) 860-8597. He should provide assistance to the people with mobility related disabilities and should proceed cautiously to an area that has emergency lights. One thing must be kept in mind that candles or other types of flames must not be used for lighting purpose. In the case of fire, activate the nearest fire alarm after evacuating the immediate area followed by calling 119. Then, let the control headquarters know the accident by calling 032-860-8597. people at the sight of fire must leave the place by using stairs only. While moving from the place, do not open the doors if they are hot and do not re-enter the building until instructed to do so by emergency responders.

3. If gas leak occurs, firstly call the control Headquarters at (032)860-8597. Secondly, the building or area must be evacuated and people with mobility related disabilities must be identified. Actions like using phones in the area of the leak, switching lights on or off, using elevators in the area and returning to the evacuated area must strictly not be done.

4. In the situation of major water leak or flood, immediately call Control Headquarters at (032) 860-8597 then if there is any possible danger, evacuate the area and If possible, turn off electrical circuit breakers to the area. If there is a person who knows the source of the water and confident of your abilities to stop it, he should cautiously try to handle the situation.

Alumni Talk

Mohammad Masun Billah,
(Bangladesh)

**Master in Information and
Communication Engineering**

THE JOURNEY

"My journey in Korea started with KGSP-2009 Scholarship and my thoughts became matured at Inha University. I learned how to conduct quality research in the field of information and communication at UWB-ITRC directed by Professor KyungSup Kwak. That was the behind story why I am now a part of the greatest Samsung Electronics here in Bangladesh.

The guidelines and care from graduate school really helps to nurture a graduate student to achieve his/her dreams. I was lucky enough to have such wonderful education and research

environment.

Inha University provided me multicultural environment. I also had great opportunity to experience Korean culture and Korean R&D environment.

I would like to express my gratitude and to wish good luck to all my friends, lab members, graduate school officials and my professor for the support during my stay at Inha University."

Prepared by SYED Md. Asif

Visal Sean (Cambodia)
**Master in Computer
and Information Engineering**

A WONDERFUL TIME AT INHA

Visal successfully gained his degree from the university in February, 2013 he came from the Intelligent E-Commerce Laboratory (currently named Artificial Intelligent Lab). He is now serving as a Program Co-ordinator in Cambodia

Korea Cooperation Center (CKCC) in Royal University of Phnom Penh (RUPP) which was programmed by KOICA and the Ministry of Education and Youth of Cambodia. CKCC's official opening ceremony was held in mid 2013 and it served as a precious place for human resource development and cultural exchange programs. In CKCC, Visal sup-

ports many major tasks including training programs, human resource management, SNS maintenance, cultural events mainly between Cambodian and Korean culture... His knowledge on smart phone application development courses is one thing he shared to our next generation. Being an alumni of Inha University, Visal stated that "My professor always takes good care of all of his students especially for foreign students. Our lab-members are really helpful and supportive; we share the knowledge and experience together. Also being a foreigner, friends are really important especially when you are abroad. For that matter, I have met many new friends when I was studying at the university; it was really the most wonderful time in my life" He would like to express his deep appreciation to INHA University who strongly provided him the education and many wonderful memories.

This is Visal's work place in Cambodia .
You might be next in line to be in this company. Good luck!

Websites: <http://gradeng.inha.ac.kr>

<http://grad.inha.ac.kr>

On the Day of the Graduation

Mr. SEN Pisei (Cambodia)

Master's in Energy Engineering,

My name is Sen Pisei, a Korean Government Scholarship Program (KGSP) grantee of 2011. The scholarship provided me a whole 3-year financial support for my graduate degree at Inha University. It supported the start of my experiences related to my student life at Inha. The university always supported me every time I have problems related to academics or if I need suggestions the graduate school would always try their best to solve and is always there for me. Aside from this, thanks to the Korean language course that provided me with powerful language as a mode of communication for my academic studies. I was then selected as the Cambodian student ambassador at Inha to be a support to my fellow students for their academic problems. Now, with all the efforts, finally the day of my graduation came.

**Congratulations to all
the Graduates !**

Special Messages to Alumni

1. Send a message about your current job position and contact information to graduate@inha.ac.kr as a member of Inha global alumni Network. The Graduate School will keep sending a newsletters or useful notices for alumni.
2. Send your message and your story to graduate@inha.ac.kr. After selecting then we will upload them for the next issue.
3. If you need any certificates about your academic records at Inha University, you can use Internet Certificate Issuing System <http://certpia.inha.ac.kr> or apply for the postal service of certificate issuance. For details, visit http://gradeng.inha.ac.kr/campus/campus_050401.aspx
4. Promote 2015 KGSP and Jungseok International Scholarship Program about admission for spring semester of 2015 to many excellent international students in your country.

I am now a successful graduate student. During the graduation, I feel excited at the same time nervous because I have been waiting for this day for such a long time, and finally here it is. I felt very happy when I first wore the graduation gown and cap which was a precious moment of my life. At that time, all of our Cambodian friends came to congratulate me and enjoy the day altogether by taking photographs and ending with a small party, for my graduation and unfortunately also for my farewell party. The feeling that I had during that day was deep and meaningful that I cannot easily describe and it is really one of the best experience in my life. For this special occasion, I would like to express deep gratitude to my academic advisor, my lab-mates, all friends and acquaintances, NIIED, and Inha University for their kind help and support.

Prepared by Sen Pisei

Editors desk

We welcome this year with the 60th Anniversary celebration of Inha University. As we celebrate this meaningful event. We have prepared this publication to promote the experience of students of Inha university to the world. This publication also aims to communicate with all international graduate students including alumni and future Inhanians.

We are happy to be able to share our story through this fourth issue of "INHA GLOBAL MESSENGER".
